MVO Weekly Report for the Period 30 July to 06 August 2021

Activity at the Soufrière Hills Volcano remains low.

The seismic network recorded 15 volcano-tectonic earthquakes and one rockfall this week.

SO₂ flux measurements were taken by boat on 04 August and by helicopter on 05 August. The average flux values were 519 tonnes per day on the 04 August from seven traverses and 425 tonnes per day on 05 August from ten traverses.

Due to the large size of the lava dome, pyroclastic flows can occur at any time without warning on any side of the volcano, including Gages from where they can travel rapidly into Plymouth. Tracks across the Belham Valley can be destroyed or heavily modified by flash flooding or lahars, and caution should be exercised crossing the valley during and after rainfall.

The Hazard Level is 1. There is no public access to Zone V, including Plymouth. Maritime Zones E and W are daytime transit only between sunrise and sunset (boats may sail through the zone but must not stop). Anyone who ignores these restrictions is liable to be prosecuted.

This report along with additional information on the Soufrière Hills Volcano and the Hazard Level System can be found at the MVO website: www.mvo.ms. Old weekly reports can be downloaded from http://www.mvo.ms/pub/Activity_Reports/. You can also follow @mvoms on both Facebook and Twitter.

Monitoring Data Summary

Seismic Activity (number of events)

| | This week | Last week | Last 4 weeks (weekly average) |
|---------------------------|------------------|------------------|--|
| Rockfalls | 1 | 0 | 0 |
| VT earthquakes | 15 | 4 | 5 |
| Hybrid earthquakes | 0 | 0 | 0 |
| LP earthquakes | 0 | 0 | 0 |

Sulphur Dioxide Flux (tonnes per day)

| | This week | Last week | Last 4 weeks |
|----------------|------------------|------------------|---------------------|
| Average | 464 | 415 | 445 |
| Maximum | 584 | 573 | 601 |
| Minimum | 337 | 309 | 334 |

Note: The numbers provided in the tables above are provisional and may be subject to change after further analysis of the data.
